Platforms on Tower? Yes No

Description of Issue with Tower

Date Scanning Required

- Before mobilization ScanTech requests a PDF of the tower drawing showing the height of the internal components and orientation of trays relative to external nozzles or manways.
- ScanTech requires access to the elevation on the tower for the desired CAT Scan from either fixed ladders and platforms or by the use of manlift or crane. Access is required to all sides of vessel.
- Note - the equipment used in CAT Scanning is battery operated and not intrinsically safe.
