Insulation Type and Thickness

Fluid Inside of Pipe and Density

Expected Blockage Material and Density

Access to Piping (Ground or Elevated)

Description of Piping

Date Scanning Required

- Before mobilization ScanTech requests a PDF showing the approximate extent of the piping to scan
- ScanTech requires access to the piping from either ladders, scaffold or by the use of manlift or crane.
- All piping to be scanned must be accessible to the exterior on 2 sides.
- Note - the equipment used in Pipe Scanning is battery operated and not intrinsically safe.
